MEMORANDUM FOR THE RECORD

SUBJECT: [] Telephone System

25X1

1. The Automatic Dial Telephone System [] was installed in 1963. The equipment was manufactured in Japan and is a 400 line (expandable to 600 line) Automatic Telephone Switching System of the 48 volt Stowger step by step line finder (non-attended) type. The equipment is identical to that manufactured by The Automatic Electric Company in the U.S. The operation and maintenance bulletins number 945-800 through 945-821 used ~~with~~ with this equipment are published by The Automatic Electric Company. The installed equipment consisted of the ~~400~~ 400 line switching system including testing equipment, signalling equipment, power equipment and trunking equipment with ~~ten~~ ten first selectors installed in the [] Office.

25X1

2. The system has now been equipped with the Military Autov^oan System and was in the process of ~~installing~~ installing equipment to comply with the new Military Integrated Telephone System (MITS) in April 1969.

3. The station telephone switchroom was expanded in early 1969 for the purpose of accommodating this equipment and to relocate the indigenous telephone operators and their switchboard [] The objective of ~~MITS~~ MITS is to provide a general system for the integration upgrading, modernization and expansion of telephone facilities

Information on [] Telephone Systems

1. Reference is made to my recent conversation with you and [] concerning the subject matter.

2. Please prepare a paper reflecting details on the systems currently [] regarding future plans for modifying them. Also include any comments concerning who might best be able to make the changes to the systems and provide maintenance thereon.

3. The above is in addition to the teletype we discussed indicating that we are aware [] and making whatever recommendations are appropriate regarding installation and maintenance.

4. I need the first bit of information in order to discuss the problem with the Deputy Director of Logistics since I now have the names of 16 individuals with telecommunications/electrical background who might be able to provide 90- to 120-day TDY on telephone maintenance service.

5. I discussed this matter informally with [] Chief, Staff Communications Division, OC, and I feel that [] who works on the classified telephone system for Commo, can be of some assistance in determining what kind of qualifications are required to work on the system if it is necessary for us to provide a TDY'er. After developing the above information, could you or [] and determine if any of the individuals in the attached listings could perform the service. It is extremely important in this instance to keep this matter informal in view of the statement in the transmittals that "any personal contact" with the individuals listed must be arranged through proper Office of Communications' channels.

6. I would like to have all of the above completed no later than 7 April 1970.
